

## Rotary Encoder

TRM supplies a range of quality British manufactured encoders. Made by BEC (British Encoder Company). TRM offers the 260-HV encoder from stock as a standard as it is suitable for the majority of applications. Connection details and electrical details can be found via [this link](#)

### Series 260

The Series 260 low-profile 30mm package design makes it a perfect solution for many machine and motor applications, and features a complete through-shaft design.

The Series 260 and its integral bearing-set provide for stable and consistent operation, without concerns for axial or radial shaft runout. The standard 100° C temperature capability allows servo motors to operate at higher power outputs and duty cycles.
